PROFESSIONAL PROFILE

Software Development Technician and English Translator with strong technical background, product judgment, and advanced English proficiency. Hands-on experience delivering end-to-end solutions for real clients: **TurnoLex** (multi-tenant SaaS in production), **NutriApp** (nutrition practice management system), **Car Dealership System** (inventory and sales management), and payment automation bots via WhatsApp and Telegram. Proven ability to analyze requirements, design architecture, implement, and document complete software solutions. Committed to continuous learning and technical excellence. Available for remote work internationally.

PROJECT EXPERIENCE

TurnoLex — Appointment Management SaaS for Law Firms PERSONAL PROJECT

Full Stack Developer — Personal Project

February 2026 | turnolex.vercel.app

Multi-tenant SaaS platform for Argentine law firms. Deployed to production with automated CI/CD from GitHub. Features multi-tenant architecture, three-level role system, interactive calendar, PDF generation, and transactional emails.

▲ Vercel (Frontend)

○ Railway (Backend)

● MongoDB Atlas

☁ Cloudinary

Key responsibilities and achievements:

- Multi-tenant architecture with complete data isolation per firm via estudioId
- Three-level role system: Admin, Lawyer, and Client — with navigation guards per role
- Interactive calendar using FullCalendar — daily, weekly, and monthly views
- Automated PDF receipt generation with professional design using PDFKit
- Firm approval system with superadmin panel and transactional emails (confirmation, reminder, cancellation)
- File uploads with Cloudinary — firm logos and profile pictures
- Analytics dashboard with line, pie, and bar charts using Recharts
- Full CI/CD pipeline: GitHub push → automatic deploy to Railway and Vercel

Tech stack:

React • TypeScript • Vite • Node.js • Express • MongoDB • Mongoose • JWT • Cloudinary • PDFKit • Nodemailer • FullCalendar • Recharts

NutriApp — Nutrition Practice Management System IN DEVELOPMENT**Full Stack Developer — Client Project**

March 2026 — Present | github.com/Gonza28fq/nutriapp

Full-stack web platform for nutrition practices. Manages patients, appointments, consultations, anthropometric measurements, meal plans, and a public blog. Includes PDF and Excel export, progress charts, and a customizable color theme system per practice.

▲ Vercel (Frontend)

○ Railway (Backend)

🗄 MySQL

Key responsibilities and achievements:

- MVC backend architecture with 4 well-defined layers: Routes, Controllers, Models, Middlewares
- JWT authentication with automatic logout on token expiry via Axios interceptor
- Rate limiting: 500 req/15min global + 20 attempts on /api/auth (brute-force prevention)
- Dual validation: Zod on frontend + express-validator on backend with physiological ranges
- Meal plan generation as PDF (jsPDF) and Excel export (SheetJS)
- Interactive weight and BMI evolution charts with Recharts
- 6-color theme system using CSS Custom Properties — persists in DB and localStorage
- 13 MySQL tables with complex relationships; 15+ documented REST endpoints

Tech stack:

React 18 • TypeScript • Vite • Tailwind CSS • Zustand • React Hook Form • Zod • Axios •
Recharts • jsPDF • SheetJS • Node.js • Express • MySQL • JWT • Helmet • express-rate-limit

Car Dealership Management System IN DEVELOPMENT**Full Stack Developer — Client Project**

April 2026 — Present | github.com/Gonza28fq/Concesionarlalba-ez

Internal system for a used car dealership. Manages vehicle inventory with up to 10 photos per unit, handles pricing with bulk inflation adjustment, tracks repairs, processes sales, and maintains a full audit log of all critical actions.

Key responsibilities and achievements:

- Full vehicle CRUD with multiple photo uploads (up to 10 — first photo = main image)
- Price management: individual update + bulk percentage adjustment with automatic change history
- Per-vehicle repair log with date, cost, and provider/shop
- Sales registration with complete buyer profile (name, ID, phone, address)
- Two-role system: Admin (full access) and Salesperson (view + register sales only)
- Read-only audit log: logins, sales, price changes and deletions — all with timestamp
- License plate and VIN enforced unique at the database level
- Sold vehicles automatically locked for editing or deletion

Tech stack:

React • Tailwind CSS • Node.js • Express • PostgreSQL • JWT

La Pinta Burger Club — Bar Management System IN DEVELOPMENT**Full Stack Developer — Client Project**

May 2026 — Present

Full operational management system for a burger bar. Multi-role architecture with 5 access levels, real-time order flow via Socket.io, drag & drop floor plan, dedicated kitchen tablet screen, and metrics dashboard with Excel export.

Key responsibilities and achievements:

- 5-role system: Owner, Manager, Waiter, Cashier, and Kitchen — differentiated access and views per role
- Full order flow with Socket.io — real-time notifications between waiter, cashier, and kitchen
- Drag & drop floor plan — table positions persisted in the database
- Dedicated kitchen tablet screen with large order cards and 15-min time alert
- Order form with editable prices, custom items, and load timestamp for audit control
- Cashier module with 4 payment methods — automatic table close on payment
- Metrics dashboard: top products, payment methods, waiter performance — Excel export
- Per-employee audit log with date filter — traceable orders, payments, and shifts
- Menu card HTML generator — design-branded, always up-to-date from the database

Tech stack:

React 18 • Node.js • Express • PostgreSQL • Socket.io • JWT • React Router v6 • xlsx (Excel export)

Payment Verification & Alert Bots DELIVERED

Backend Developer / Automation — Client Projects

March 2026 | github.com/Gonza28fq/mp-whatsapp-bot

Two automation solutions for businesses using digital payments. **WhatsApp Bot:** verifies in under 3 seconds whether a transfer has landed in Mercado Pago. **Alert System:** monitors Mercado Pago and Brubank and sends instant Telegram alerts to employees at each branch the moment a payment arrives.

○ Railway (24/7) ➔ Telegram Bot API 📱 Twilio WhatsApp 🇵🇸 Mercado Pago API

Key responsibilities and achievements:

- Direct query to the Mercado Pago API — rejects customer screenshots (fraud prevention)
- Response in under 3 seconds with amount, exact timestamp, and payer email
- Natural language support: understands "\$5000", "did it land?", "latest payments", "5000 5 min ago"
- Multi-branch alert system: each employee only receives alerts for their own location
- Read-only access to Mercado Pago — the bot cannot make payments or transfers
- Access token stored as encrypted environment variable in Railway — never in source code
- Railway deploy with automatic restart on failure — ~\$6-7 USD/month operating cost
- Phone-number-based access control: only authorized employees can query the bot

Tech stack:

Node.js • Express • Twilio (WhatsApp API) • Telegram Bot API • Mercado Pago API • Railway

Task Manager — Full Stack Web Application

Full Stack Developer — Personal Project

February 2026 | github.com/Gonza28fq/gestor-de-tareas

Full-stack task management web app with complete authentication, subtasks, deadline notifications, drag & drop, and dark mode.

- Full JWT authentication — registration, login, and logout
- Complete CRUD with frontend and backend validation
- Nested subtasks with visual progress bar
- Deadline notifications — alerts for overdue, due today, and due tomorrow
- Real-time search and filters by status and priority
- Drag & drop to reorder tasks and persistent dark mode

Tech stack:

React • TypeScript • Tailwind CSS • Node.js • Express • MongoDB • JWT

Commercial Management System 2.0 — Senior Thesis Project

Full Stack Developer

January 2024 – November 2024 | github.com/Gonza28fq/Tesis_Final

Comprehensive business management system developed individually, automating internal commercial processes with 240-page technical documentation.

Key responsibilities and achievements:

- Analyzed business requirements, identifying 6 critical operational pain points
- Designed modular architecture with 7 modules: Clients, Sales, Purchases, Products/Stock, Users, Audit, and Reports
- Implemented complete role and permission system with dynamic interfaces per profile
- Robust security: password hashing, stored procedures, real-time validations
- Full data migration from legacy systems (Excel spreadsheets)

- 85% reduction in administrative errors; real-time inventory control with automated alerts

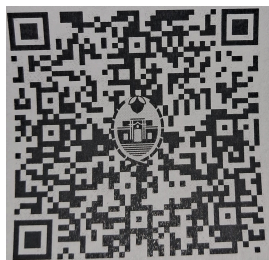

Tech stack:

PHP • JavaScript • HTML5 • CSS3 • Bootstrap • MySQL/MariaDB • Apache • REST API •
Composer

EDUCATION

Associate Degree in Software Development

Instituto 9 de Julio | San Miguel de Tucumán, Argentina | 2022 – 2024

Academic validation for the Software Development Technician degree.

English Translator

Instituto de Ciencias Empresariales (ICE) | 2021 – 2024

Academic validation for the English Translator credential.

TECHNICAL SKILLS

Languages

JavaScript/TypeScript • PHP • Python • C# • HTML5 • CSS3 • SQL

Frontend

React 18 • TypeScript • Vite • Tailwind CSS • Bootstrap • Zustand • React Hook Form • Zod • FullCalendar • Recharts

Backend

Node.js • Express • PHP • REST API • JWT • Nodemailer • PDFKit • jsPDF • SheetJS • Multer • Helmet • express-rate-limit

Databases

MongoDB • MySQL • MariaDB • PostgreSQL • SQLite • Mongoose • Stored Procedures

Deploy & Cloud

Vercel • Railway • MongoDB Atlas • Cloudinary • GitHub CI/CD

Security

Password Hashing (bcrypt) • JWT Auth • CORS • Rate Limiting • Multi-tenant • SQL Injection Prevention • express-validator • Zod

Automation & Bots

Telegram Bot API • Twilio WhatsApp API • Mercado Pago API • Webhooks • Node.js scripting • Railway 24/7

IT Support

Hardware/software troubleshooting • OS installation (Windows/Linux) • Networking & connectivity • End-user support (in-person & remote) • Preventive and corrective maintenance

CERTIFICATIONS & CONTINUOUS LEARNING

JavaScript Algorithms and Data Structures

freeCodeCamp | 2025 | Verified certification

Cybersecurity

In progress (2025)

LANGUAGES

Spanish

Native

English

Advanced — Fluent in Technical English

- Full comprehension of technical documentation in English
- Professional written communication
- Certified English Translator

ADDITIONAL INFORMATION

- Available for remote work (international and local)
- Available for on-site work
- Proven track record delivering real solutions to clients on short timelines
- Strong self-learning ability and quick adaptation to new technologies
- Focus on best development practices, security, and clean code
- Continuous growth mindset and constant professional development
